OCT 2018

Apply Today: AHW Issues Call for 'Health Issue Brief' Team Members

Funding available to support selected applicants in developing guiding documents

In 2019, AHW will begin implementation of [our next five-year plan](#). Through this plan, we are targeting [three priority areas](#) of health need in Wisconsin, taking a cells-to-society approach to **improve heart health, support healthy minds, and dismantle cancer**. Using a health equity lens, we will look to approach each of these focus areas across key determinants of health, striving for collective, collaborative impact in our investments and action.

To make this possible, we need you. We have issued an [invitation](#) for individuals who can help us identify the greatest levers across the determinants of health that can be pushed and pulled to drive impact in each of these focus areas.

Individuals with the necessary experience and expertise in each area are asked to [apply to join a multi-sector team](#) in examining the current state of each focus area in Wisconsin, producing a final Health Issue Brief that will guide us, our governing boards, applicants, and stakeholders in catalyzing progress and impact in each area.

Applications are due by 12 noon (CST) on November 15, 2018. Team announcements will be made mid-December 2018.
